LINUX - 5.10.103-v7l+

Percentage of CPU-all utilization at the user level [application] (%usr)

Percentage of CPU-all utilization at the system level (%sys)

Percentage of time that the CPU-all were idle with outstanding disk I/O request (%iowait)

Total number of transfers per second that were issued to physical devices (tps)

Total amount of data read/write from/to the devices in blocks per second

Total number of read/write requests per second issued to physical devices

Run queue length [no. of tasks waiting for run time] (runq-sz)

System Load Average

Number of tasks in task list (plist-sz)

Number of tasks currently blocked, waiting for I/O to complete (blocked)

Percentage of used memory (%memused)

Amount of used memory (kmemused)

Amount of memory needed for current workload (kbcommit)

Percentage of memory needed for current workload [RAM+swap] (%commit)

Number of system pages on disk

Number of system page faults

Number of system pages on free list

Metric of efficiency of page reclaim (%vmeff)

Number of memory pages freed per second (frmpg/s)

Number of memory pages freed per second (frmpg/s)

sarchart.dotsuresh.com

Number of additional memory pages used as buffers per second (bufpg/s)

Number of additional memory pages used as buffers per second (bufpg/s)

sarchart.dotsuresh.com

Number of additional memory pages cached per second (campg/s)

Number of additional memory pages cached per second
(campg/s)

sarchart.dotsuresh.com

Total number of sockets used by the system (totsck)

sarchart.dotsuresh.com

Number of IP fragments currently in use (ip-frag)

Number of Sockets currently in use
